Beachfront Studios for Sale in Primorsko – New Build with Sea Views

Apartments · Studios · For Sale · Property Code: 4309

A new opportunity to purchase a **beachfront studio in Primorsko**, in a high-quality residential building currently under construction directly beside the beach and within the central part of the town. The location combines immediate access to the sea with the convenience of shops, restaurants, local services and the main urban infrastructure of Primorsko all close at hand.

The studios start from **43.41 sq.m** and are designed as comfortable residential properties suitable for both year-round living and extended stays by the sea. The layouts make efficient use of the internal space, while the contemporary architecture, large terraces and open coastal setting create a bright and spacious feel.

The defining feature of the property is its **true beachfront position**. The sandy beach lies directly in front of the building, placing the sea at the centre of everyday life. A large proportion of the apartments are designed to benefit from **sea views**, making the location and outlook an essential part of the property rather than simply an added feature.

The building is situated in the **central area of Primorsko**, so owners can reach restaurants,

supermarkets, shops, municipal services and other everyday amenities on foot. This balance between beachfront living and a fully developed town environment makes the apartments suitable for buyers who want to use their property throughout the year, not only during the summer season.

The architectural design is modern and refined, with generous terraces and a façade that takes full advantage of the coastal setting. The development is planned as a **high-quality residential building for year-round use**, offering different apartment types within the same project.

Construction has already started. Buying at this early stage gives purchasers a wider choice of available studios by floor, orientation and position within the building. **Parking spaces and garages** are also available, subject to current availability.

The apartments are offered **direct from the developer**, and buyers can use an **instalment payment plan during the construction period**. This creates greater flexibility for those purchasing off-plan and allows payments to be spread across the different stages of construction.

For buyers searching for a **new-build beachfront property in Primorsko**, this development brings together the features that matter most: direct beach access, **sea views**, a central location, contemporary construction and the opportunity to buy **direct from the developer with staged payments during construction**.

Contact Royal Homes for current studio availability, floor plans, sea-view options, parking choices and detailed payment terms.
